

Phase Stable Cable Assemblies

- Phased Array Systems
- System Interconnects
- Phase Stable Test Cables
- All System Platforms
(Ground, Sea, Airborne and Space)

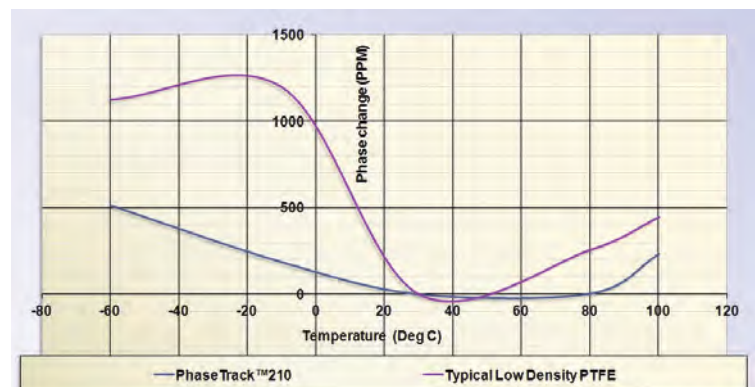

PhaseTrack® cable assemblies are designed for applications demanding minimal phase change over temperature. All PhaseTrack cables use proprietary TF4™ dielectric that does not have the abrupt shift in the phase that occurs with solid or tape wrapped PTFE based products under normal room ambient temperature conditions.

PhaseTrack cable has the same triple shield construction used in Times popular SF, SFT, SilverLine and MT cables.

Features:

- Superior Stability (vs LD PTFE)
- PTFE "Knee" is Nonexistent
- TF4 Dielectric Technology
